NOTES IN EXPLANATION OF CATALOGUE

☞ Boxed items call your particular attention to varieties on which we are offering especially attractive prices.

☞ The figures following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

☞ We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2'-4', 20c 4'-6', 30c 6'-8', 40c 8'-10', 50c 10'-12', 60c

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

☞ Reservations of specimen plants—For an additional 25% customers will be permitted to select and reserve specimen plants in the nursery blocks for future delivery.

☞ Quantities of 5, 25 and 250 will be sold at the ten, hundred, and thousand rate, respectively.

NEW HARDY EVERGREEN BERBERIS

We have a good assortment of these new varieties which are very attractive in both dark green holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the Winter months. Under favorable conditions most of them will attain a height of about six feet.

gagnepaini. Has long and very narrow holly-like leaf.

julianae. Fairly rapid growth with broader spined leaves.

laevis. Similar to *julianae*.

sargentii. Leaves very lightly spined, otherwise similar to *julianae* in habit.

"MAPLETON," a farm of three hundred acres with its massive stone house, was the Van Dyck homestead built in 1756 by Mathias Van Dyck. In December 1776 it was occupied by the British. It is now the home of William Flemer, Jr., and here hospitality awaits you as in days of old.
